CHILD WELFARE WORKFORCE⁴⁸

- A 2003 General Accounting Office (GAO) report documented that staff shortages, high caseloads, high worker turnover
 and low salaries impinge on delivering services to achieve safety, permanence, and well being for children. In Children's
 Rights 2009, A Long Road Home report, similar challenges to the child welfare caseworkers were identified, in addition
 to no standard training or consistent background requirements, need for meaningful supervision, and lack of private
 workspace, technology and other resources.⁴⁹
- The federal Child and Family Service Reviews have clearly demonstrated that the more time a caseworker spends with a child and family, the better the outcomes for those children and families.⁵⁰
- According to the 2003 GAO report, the average caseload for child welfare/foster care caseworkers is 24–31 children; these high caseloads contribute to high worker turnover and insufficient services being provided to children and families.
 CWLA recommends that foster care caseworkers have caseloads of 12–15 children.⁵¹
- The National Association of Social Workers 2012 Document to the Obama Administration called for full funding of the Child Abuse Prevention and Treatment Act (CAPTA) and Promoting Safe and Stable Families (PSSF), protection of the Social Security Block Grant (SSBG) from budget cuts and elimination, a variety of child maltreatment prevention services to be available through programs serving children and families (e.g., TANF, Head Start, etc.), maximization of collaboration amongst different systems (e.g., Child Welfare, Public Health, Juvenile Justice, etc.) to improve integration, culturally and linguistically appropriate delivery of services, identification and implementation of evidence-based practices, and incentivization of BSW and MSW students to join the child welfare workforce.⁵²

FUNDING CHILD WELFARE SERVICES FOR KENTUCKY'S CHILDREN

- ⁴⁸ Note: The dearth in current state-by-state workforce data makes clear the need for critical data on compensation, working conditions including safety issues, academic degrees held, education and training received, and factors contributing to turnover. To address this, CWLA is calling for Congress to authorize the National Academy of Sciences (NAS) to conduct an updated study on the child welfare workforce. It would make recommendations regarding caseloads and workloads, education levels, and training requirements. In addition, the study would examine data reporting and collection and make recommendations on how states might improve these efforts.

Examples of administrative services include management information systems, training programs, eligibility determination processes, and all services that provide the infrastructure supports for the public agency. Current information is also needed in regards to state and local spending on child welfare programs. Particularly, in light of financing reform efforts, it would be helpful to know how state and local budgets have changed in the wake of American Recovery and Reinvestment Act (P.L. 111-5) investments and the ongoing effects of the recession
