- 24,585 children younger than 18 were arrested in Ohio in 2014. Violent crimes were the reason for 975 of the arrests in 2014.⁴⁹
- 2,283 children lived in juvenile correction facilities in Ohio in 2013.⁵⁰

CHILD WELFARE WORKFORCE⁵¹

- The federal Child and Family Service Reviews have clearly demonstrated that the more time a caseworker spends with a child and family, the better the outcomes for those children and families.⁵²
- According to a 2003 GAO report, the average caseload for child welfare/foster care caseworkers is 24–31 children; these high caseloads contribute to high worker turnover and insufficient services being provided to children and families. CWLA recommends that foster care caseworkers have caseloads of 12–15 children.⁵³
- Average turnover rates for child welfare agencies range from 20% to 40%.⁵⁴ Turnover rates at around 10% are considered to be optimal in any agency.⁵⁵
- Caseworker turnover has negative outcomes for children in the child welfare system, including placement disruptions and increased time in out-of-home care.⁵⁶
- According to the National Survey of Child and Adolescent Well-Being II baseline report, 75% of caseworkers earned a salary between \$30,000 and \$49,999.⁵⁷
- The majority of caseworkers hold a bachelor’s degree (52.3%) or a bachelor of social work degree (21.9%). Only 25% of caseworkers hold a master’s degree.⁵⁸
- A workload model in Colorado found that approximately 574 additional caseworkers were needed in their state to adequately provide child welfare services, due to estimated time requirements for meaningful services. This number represents a 49% increase that is needed on top of hours already spent on case related tasks.⁵⁹

FUNDING CHILD WELFARE SERVICES FOR OHIO’S CHILDREN

- In 2012, Ohio spent \$1,340,213,436 for child welfare services. Child welfare services are all direct and administrative services the state agency provides to children and families. Of this amount, \$443,218,056 was from federal funds, \$86,867,877 from state funds, and \$810,127,503 from local funds.⁶⁰
- In 2012, of the \$443,218,056 in federal funds received for child welfare, 87.2% was from Title IV-E Foster Care and Adoption Assistance, 5.3% came from Title IV-B Child Welfare Services and Promoting Safe and Stable Families, 0.5% was from Medicaid, 5.9% came from Social Services Block Grant, 0.4% was from TANF, and 0.7% came from other federal sources.⁶¹
- Ohio received \$149,702,753 in federal funds for IV-E foster care expenditures in 2012, including \$64,135,088 for maintenance payments and \$85,567,665 for administration, child placement, the statewide automated child welfare information system, and training.⁶²

⁵¹ Note: The dearth in current state-by-state workforce data makes clear the need for critical data on compensation, working conditions including safety

issues, academic degrees held, education and training received, and factors contributing to turnover. To address this, CWLA is calling for Congress to authorize the National Academy of Sciences (NAS) to conduct an updated study on the child welfare workforce. It would make recommendations regarding caseloads and workloads, education levels, and training requirements. In addition, the study would examine data reporting and collection and make recommendations on how states might improve these efforts.

Note: Examples of direct services include child abuse/neglect investigations, foster care, community-based programs, case management, and all such services required for the safety, permanency, and well-being of children. Examples of administrative services include management information systems, training programs, eligibility determination processes, and all services that provide the infrastructure supports for the public agency. The component funding streams may not equal the total, depending on additional child support and demonstration funds for this state.
