Alex Azar, Secretary, Department of Health and Human Services 330 C Street, S.W. Washington, D.C. 20201

Lynn Johnson, Assistant Secretary, Administration for Children and Families Department of Health and Human Services 330 C Street, S.W. Washington, D.C. 20201

Jonathan Hayes, Director, Office of Refugee Resettlement Administration for Children and Families Department of Health and Human Services 70 L'Enfant Plaza SW # 8W, Washington, DC 20447

June 11, 2019

Dear Secretary Azar, Assistant Secretary Johnson, and Director Hayes,

The undersigned organizations are writing to condemn the administration's decision to suspend recreational and educational services for unaccompanied migrant children and youth in federally contracted migrant shelters. Consequently, thousands of unaccompanied children will lose out on learning opportunities and time to exercise their growing minds and bodies. We urge you to reverse this decision and maintain these vital services.

As of June 2, 2019, an estimated <u>13,200 minors</u> were being held in shelters contracted by the Office of Refugee Resettlement (ORR). The <u>majority</u> of children in ORR custody come to the U.S. from Guatemala, Honduras, or El Salvador and are between the ages of 13 and 17. It is widely recognized in international, federal, and state law that children are unique from adults and should be afforded special protections that support their developmental needs. This is why, under the *Flores* settlement, federally contracted migrant shelters are required to place children in the least restrictive setting that is in the best interest of the child and are subject to state licensure requirements for foster care facilities. The *Flores* settlement and state licensure laws recognize that services deemed "non-essential" by ORR--including English, math, science, and reading classes and outdoor activities such as soccer and basketball--are in fact fundamental to promoting children's healthy development and learning. Without these services, ORR-funded facilities will be a step closer to resembling adult immigration detention centers.

Importantly, many unaccompanied children experienced <u>incredible trauma</u> in their home countries, such as abandonment, sexual or physical abuse, witnessing violent crime, or kidnapping. In some cases, children were also abused or trafficked during their journey to the United States. Recreational, social, and educational enrichment activities--such as playing sports and opportunities for creative expression--are particularly important for children and youth who have experienced trauma, as these activities may help to alleviate stress and foster

resiliency. Without them, children may have fewer formal opportunities to connect with each other, establish trusted relationships with caring adults, and productively express their energy and emotions. The suspension of these activities may lead to increases in mental health and behavior problems, which can negatively impact children's ability to be released to a sponsor.

Children should be treated as children regardless of their circumstances of arrival in this country. Participating in educational and recreational services provides a small sense of normalcy in a situation that should never be any child's "normal." Suspending these services as children await placement with a sponsor--a process already needlessly drawn out by the administration--is nothing short of cruel. As organizations dedicated to the health and wellbeing of children, youth, and families, we urge ORR to maintain supportive services that every child needs to thrive.

Sincerely,
